

Shipping & Financial Audits

Real savings and refunds on billing errors and overpayments.

The Michigan Chamber offers a program to help you manage and significantly reduce your shipping/freight, merchant processing, workers' compensation and 401K/403B costs with real savings and refunds.

If you spend a significant amount in any of these areas, we can take a look and let you know if you have billing errors, are being over-charged and recover overpayments.

Benefits

This is a great new opportunity to lower your business's operating expenses and increase your bottom line!

Specialized Shipping Audits are ongoing monthly reviews of your courier (FedEx, UPS, DHL) and LTL freight invoices to identify refund opportunities for service delivery failures and billing discrepancies.

Merchant Processing Audits provide an itemized review of all credit and debit card transactions accepted by your company monthly. Without changing your current processor, we identify where adjustments can be made and how you were billed for each transaction.

Workers' Compensation Audits are an independent review of the premiums, classification codes and experience modifiers assigned to your policy by your provider. We can find where premium errors are made and recover cash refunds from 7 to 10 years back.

401K/403B Audits review your company's retirement plans to ensure they comply with Department of Labor guidelines and find any hidden ways to save you and your company money.
