To Whom It May Concern,

Mann+Hummel first learned of Tenurgy's utility auditing services through the Michigan Chamber of Commerce. Completely complimentary, we had Tenurgy review our Michigan and Tennessee plants.

By using one month of utility bills and a letter of authorization, Tenurgy was able to pull all the necessary data and begin analyzing our utility bills. At the end of the review, Tenurgy provided us an in-depth and thorough report showing the current state of our utilities plus cost saving options to explore. They were able to help implement the savings opportunities and put Mann+Hummel on pace to save over \$350,000 annually.

With the ease and success from the audit at our Michigan and Tennessee locations, we decided to add two of our North Carolina plants for Tenurgy to review.

In today's uncertain economy, businesses should be looking for any advantages and opportunities to save. Mann+Hummel has enjoyed working with Tenurgy and highly recommends their services.

Sincerely,

Rikki He
